Michael Morello joined APM MacLean in 2001 as a Foreman. Through his participation in a variety of roles within the Company, from Foreman to Student Engineer, to Field Engineer, to Project Engineer and to Project Manager, Michael has developed proven expertise constructing high visibility projects that require specialized skills, sensitivity to unique program requirements and knowledge in all aspects of the construction process. As Michael progressed his career with APM MacLean, he returned to school to complete his Civil Engineering Degree from the University of New Brunswick.

As the VP of Construction, Michael is an instrumental part of our team, with a consistent track record of success in the management of critical projects for several of Canada's largest corporations, from design through to construction, he will leverage strategies by using the most efficient building methods.
